

Find a Country School

Are you a city school looking for a country school to partner with?

Perhaps you would like your classes to exchange blog posts, compare and contrast daily life or even visit each other?

Leave your details with us and we will find you the perfect partner school.

Find a Country School

We'd love for more connections to be made between city and country kids and it is with this in mind that we offer our Find a Country School service. If you are the type of teacher that enjoys connecting with other classrooms and exposing your students to a whole other world (in their own country) then this might just be the project for you.

Imagine the learning possibilities and the conversations rural and city classrooms could have? We're inspired by many of the classrooms we've already seen running programmes along these themes. If you're interested then leave us your details and we'll be in touch right away.
