

Rosie's Cow Cam - Streamside Planting

TED-Ed

Streamside planting is one of the activities many dairy farmers are doing to care for their land and waterways. Learn how streamside planting helps improve the quality of the water flowing through a farm.

Let's Begin...

Your teacher would like you to think about action to increase sustainability. Streamside planting is one of the activities many dairy farmers are doing to care for their land and waterways. Streamside planting helps improve the quality of the water flowing through a farm. Watch the video and complete the tasks below in preparation for further learning in class.
