

Rosie's Nutrition Mission HQ

If you've accepted Rosie's Nutrition Mission then your students will need this URL to communicate with Mission Control.

This site has everything you need to complete Rosie's Nutrition Mission including; the two problems that are the reason for this latest mission, the two design missions to choose from and a place to submit your final designs after you come in from the field. Expect a full Secret Agent experience.

WELCOME BACK SECRET AGENTS, WE HAVE DOUBLE TROUBLE ON OUR HANDS.

For some time Mission Control has had agents deep undercover all over the country. There have been daily transmissions of too many kids crying over spilt milk.

Our undercover agents have noticed two problems that kids face everyday.

It is hard for kids to pour milk without spilling it.

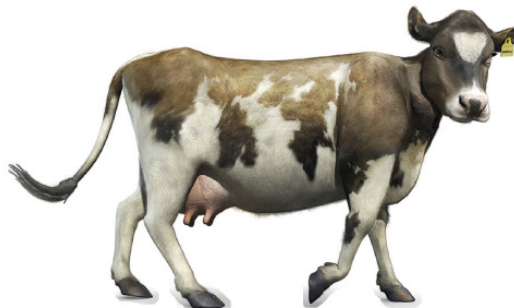

Design a milk container that is easy for kids to pour from without spilling any milk.

Kids have to rely on their parents to choose good foods for them.

Redesign nutrition labels for milk so kids can read and understand them.

Choose your mission carefully secret agents - the happiness of kids everywhere depends on you.

We have assigned a senior agent, who looks exactly like your teacher, to help you with your mission. You must persevere - many agents before you have tried and failed.

Once you have completed your mission, return to this page and submit your top secret designs by clicking on the link below. Good luck secret agents.
