

Farmers have to find ways to stop bacteria from growing in their milk

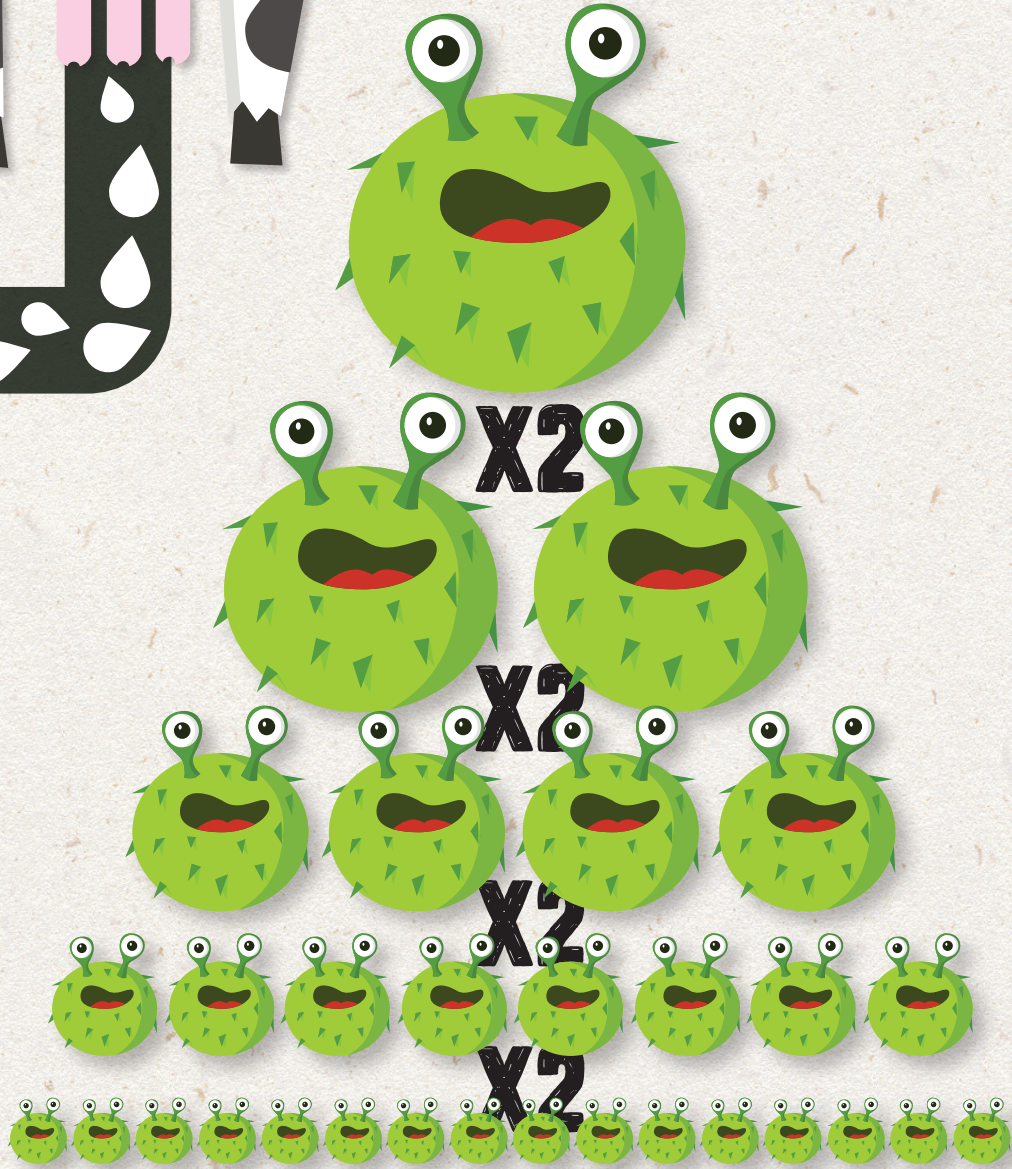

38.6°C

Dairynz

BACTERIA GROWS FAST

A bacteria party splits in two every 20 minutes - growing to 5,000 billion billion in JUST ONE DAY!

A BACTERIA PARTY

= **FOOD** + **MOISTURE** + **WARMTH**

37°C

I LOVE BEST

5°C

Bacteria won't grow when kept below 5°C

Dairy factories heat the milk up to 72°C to kill the bacteria

RIP

65°C
