Creating an Infographic

Activity

Tools

1

This step focuses on creating an infographic using the information from your international conversation. This infographic is going to be sent to all the people who have helped your group with their mission. Review the information you sorted from your international conversation. Identify the key facts needed for the infographic. Turn these facts into either a key word fact or numerical statement. Check that you have included all the information that is required in your infographic. It is important that any text you have used is simplified but it still needs to make sense and represent the information accurately.

2

Use the [image file](#) at the International Cow of Mystery Mission Headquarters to select graphics for each piece of information. You are looking for the best possible way to accurately represent the fact. You might have to be persuasive. Members of your group might disagree on what would be best. Give everyone a chance to argue their point. Think hard about which images will suit each particular piece of information. Refer to your Bubble Map examples if necessary. Remember to record this process for your Evernote archive.

3

Check with your teacher about which platform you are going to use to design your infographic. Decide as a group how to approach this. Compiling the infographic at the end or deciding the placement of each graphic as it is made. Create your infographic using the selected key phrases, numerical statements and images.

4

Swap your finished infographic with other groups. You are going to give constructive criticism of each others work. Critique your peer's infographic:

- Is it easy to read?
- Can the key fact from each graphic be interpreted accurately?
- Is there anything you don't understand?
- Is the layout clear?
- Suggest improvements
- Ask questions

Consider the feedback you receive. Decide on edits to your infographic. It is a good idea to take screenshots to record the changes. It is always interesting to reflect on where you started and what your end product looks like. Make improvements where information is not clear or layout is confusing.

5

When your group is happy that the infographic is finished, save it as a PDF. Make sure there is a copy in your Google Doc. Pin your infographic to the [interactive map](#). Instructions to help with this are at the International Cow of Mystery Mission Headquarters. This infographic will be how you report back on the outcome of your mission to everyone who helped your group. You will need to attach it to your thank-you messages.

SUCCESS CRITERIA

You can check you have completed the task successfully by:

- Completing an infographic that conveys information accurately
- Identifying the correct information to include in their infographic
- Choosing graphics that are relevant to the fact they represent
